

# Parking Enforcement

Project Owner: **Jason Russell**

## Project Abstract

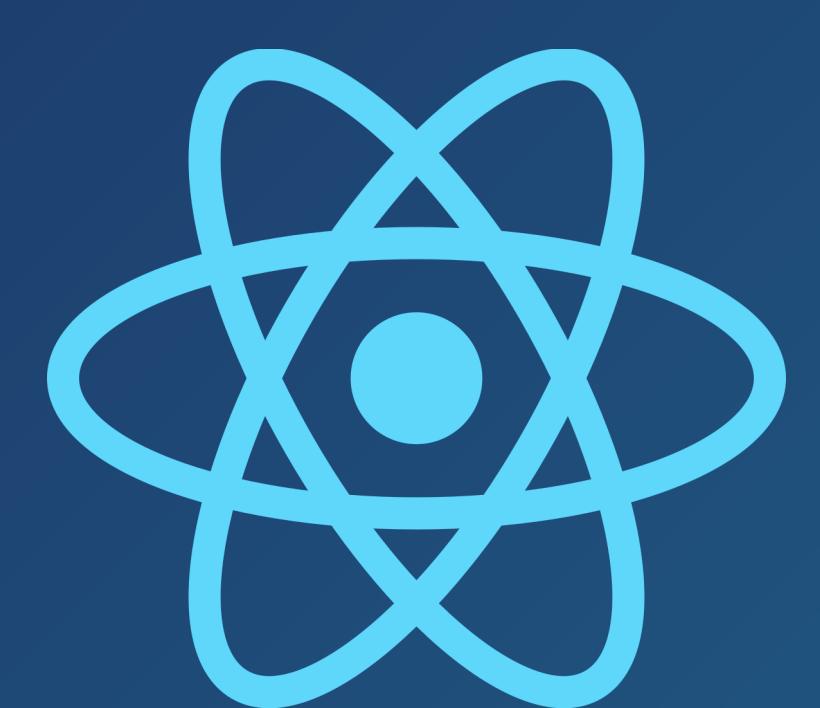

The objective of this project was to provide a web application that officers and city officials could use to create/track parking citations in their city. The application will allow users to add, edit, search for, and print citations

## Challenges

- Ensuring efficient data handling
- Making the workflow seamless for users
- Time management for other classes and full-time job

## Technologies

React

Vite

Node.js

SQL Express

Project Advisor: **TBD**
